

Live Cockpit: <https://callguard-ops.vercel.app>

Domain	Engineering Deliverables, Continuous Maintenance & Bug Fixing Focus	Timeline	Coverage	Rate Base
Phase 0	Deployed CallGuard Ops Cockpit & Diagnostic Suite (Delivered) Living diagnostic cockpit: 4-vendor trace visualizer, Scottish dialect voice tuning bench, Make.com scenario workbench, Wappi WhatsApp gateway simulator, and chaos outage tester.	Live Now	Included	\$0.00 (Live)
Phase 1	Retell AI Voice Agent Scottish Dialect & Prompt Tuning Optimize conversational prompt latency (<500ms), calibrate Glasgow/Scottish trade vocabulary (sparky, joiner, flashing, stopcock), eliminate hallucinated trade quotes, and bind structured post-call variables.	Continuous	Active	Option A / B
Phase 2	Make.com Scenario Hardening & Dead-Letter Queue (DLQ) Resilience Implement instant 200 OK webhook handshakes, Scottish E.164 phone normalizer (0141 -> +44141), 3-tier intent router (Emergency / Quote / General), and auto-retry DLQ with exponential backoff on 504 timeouts.	Continuous	Active	Option A / B
Phase 3	Wappi WhatsApp Gateway Session Management & Sub-500ms Failover Monitor multi-device WhatsApp token heartbeats, automate post-call recap message dispatches, and enforce zero-downtime sub-500ms failover to Twilio UK SMS if Wappi drops session or throws 5xx errors.	Continuous	Active	Option A / B
Phase 4	Twilio UK SIP Trunking, Carrier Reliability & Webhook Health Maintain Glasgow DDI (+44 141) routing, media stream bidirectional bridging, caller ID sanitization, backup SIP trunk failover, and carrier compliance across UK mobile/landline networks.	Continuous	Active	Option A / B
Phase 5	Incident Triage, Root-Cause Postmortems & Proactive Health Audits Rapid-response bug fixing, proactive weekly webhook log audits, Retell latency benchmarking, and preventative updates before vendor API changes impact live incoming client trade calls.	Continuous	Active	Option A / B
TOTAL 4-VENDOR TELEPHONY SUPPORT COVERAGE (MAKE · RETELL · TWILIO · WAPPI)		Ongoing	100%	\$50/h or \$80/h

OPERATING ENGAGEMENT: TWO COMMERCIAL PACKAGES		DETERMINISTIC ARCHITECTURE GUARDRAILS	
Option A (Recommended): Part-Time Retainer (10h/wk min)	\$50.00/hr (\$500/wk)	✓ Zero Dropped Calls Guarantee: Sub-500ms auto-failover to Twilio SMS if Wappi drops connection.	
Option B (Pure Adhoc): On-Demand Support (Zero min)	\$80.00/hr (As Needed)	✓ Fast 200 OK Handshakes: Decouples Retell from downstream webhooks to prevent call timeout drops.	
Option A Emergency Response SLA (Call Drops / Outages)	< 2 Hours Priority	✓ Scottish Trade Slang Lexicon: Specialized prompt engineering tuned for Glasgow & West Scotland accents.	
Weekly Proactive Webhook & Gateway Health Audits	Included in Option A	✓ Regex E.164 Normalization: Standardizes UK landlines (0141) and mobiles into international E.164.	
Upwork Work Diary Tracking & Weekly Git Commits	100% Transparent	✓ Securiti Certified AI Governance: NIST AI RMF and OWASP Top 10 inline PII redaction and safety bounds.	

TWO SUPPORT MODELS	TRANSPARENT TRACKING	100% CLIENT IP OWNERSHIP	RAPID OUTAGE SLA
Select Option A (\$50/hr, 10h/wk min) for dedicated proactive coverage, or Option B (\$80/hr) for pure on-demand fixes.	Every minute tracked via Upwork Work Diary with clear memo notes, test verification logs, and git commit references.	All Make.com blueprints, Retell prompt iterations, regex parsers, and custom webhook code belong 100% to Stuart & Co.	Priority <2-hour response window for critical call drops or webhook failures during UK operating hours (Option A).
